Career Objective

Motivated and enthusiastic Electronics and Communication Engineering student with an interest in Python Full Stack Development. Seeking an opportunity to enhance technical skills, gain practical experience, and contribute effectively to organizational growth through continuous learning and innovation.

Education

Bachelor of Technology (B.Tech) – Electronics and Communication Engineering (ECE)

Anantha Lakshmi Institute of Technology and Sciences

2022–2026

Intermediate – MPC

LRG Naidu Junior College

2020–2022

Secondary School Certificate (SSC)

ZP High School, Sasanakota

2020

Technical Skills

- **Programming Language:** Python
- **Frontend Technologies:** HTML, CSS, JavaScript
- **Database:** SQL
- **Tools:** GitHub, VS Code

Projects

LED Distance Indicator

- Designed and developed an LED-based distance indicator system to measure the distance between an object and the sensor using embedded system concepts.
- Implemented sensor technology to detect object proximity and used LED indicators to display different distance levels accurately.
- Improved the effectiveness of distance monitoring by providing a simple and efficient visual representation system.
- Gained practical experience in circuit design, sensor integration, and hardware implementation during project development.

Performance Analysis of MAC Unit with Various Parallel Adders

- Conducted performance analysis of Multiply Accumulate (MAC) units using different types of parallel adders in digital system design.
- Compared multiple adder architectures based on important performance metrics such as speed, delay, power consumption, and efficiency.
- Evaluated the effectiveness of various adders to identify optimized solutions for improving computational performance in hardware systems.
- Enhanced understanding of digital electronics, VLSI concepts, and hardware optimization techniques through project implementation.

Internship

VLSI Design and Chip Architecture

- Gained knowledge in VLSI design concepts and chip architecture fundamentals.
- Studied integrated circuit design and optimization techniques.

Strengths

- Quick Learner
- Problem Solving
- Teamwork
- Time Management

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
